

## **The Sustainability Store @ WeatherWorks Australia Supporting Sustainable Living**

**We supply an assortment of water, soil and weather related instruments including Automatic Weather Stations to schools, business, agriculture and the general public. Our garden and home related products include raised garden beds, rainwater tanks, 'wheelie-bin' worm farms, compost bays, grey-water recycling systems as well as gardening books both general and school related. Our 'wheelie-bin' worm farms are very popular with schools in both Metropolitan Perth and Country W.A.**

**As well as at schools, we display our products at Science Conferences, Field Days, Expos, Agricultural Shows (including the Perth Royal Show), W.A Garden Show-Perry Lakes, Small Farm Field Days, Biodynamic Festivals, Perth City Farm, ABC Open Gardens, Farmers Markets, School Fairs and the yearly UWA Perth Sun Fair. This year we have added new venues to our display list including the Denmark Energy and Water Expo, Wagin Woolarama, Warren District Agricultural Show, Landcare Expo Muchea, GinGin Expo, Balingup Small Farm Field Day, Hills Harvest Festival and more to follow.**

**We are also members of STAWA, GAWA, Australian Association of Environmental Education, W.A Organic Growers Association, Diggers Club, Stephanie Alexander Kitchen Garden Foundation, Australian Meteorological & Oceanographic Society and others.**

**At a personal level we are virtually a sustainable house thanks to organic garden produce, solar panels, large rainwater tanks and other sustainable items.**

**Please use the Contact form on our site [www.weatherworks.com.au](http://www.weatherworks.com.au) for any requests, information and orders**
